"Analysing the Discrimination of Gays Men in Society"

"A Sociological Study"

•Chapter 1

INTRODUCTION

To know about the topic accurately firstly we need to know what does the word 'Gay' mean?

Homosexuality Refers to the attraction between two people who are of the same sex. It comes from the Greek word 'Homos' meaning 'the same.'

It is a sexual orientation, as opposed to a gender identity such as male. People who are homosexual may refer to themselves as Gay. There is no one way to experience same-sex attraction. Many people who are gay develop feelings for people of the same sex in their teenage years. However, it can take some time to find what you're most attracted to or to be comfortable in acknowledging it to yourself and others. People experience sexual, romantic, and emotional feelings toward another person in different ways at different points in their lives.

There is a lot of homophobias in the United States and around the world. In many countries, it is illegal to be Gay. People who are anti-gay have spread several harmful myths demonising homosexuality.

What does the word discrimination mean?

The word 'Discrimination' is unfairly treating a person or a group of people against their sex preferences or other aspects. Discrimination can badly affect the society spreading negativity among beings. These negative beliefs can affect the physical and mental health of a person of the gender Gay and their partners too.

Focusing on the core of the topic.

The word 'Gay' is often heard typically when people use this phrase, they are using "gay" as a synonym for something bad, negative, or less desirable. The use of this phrase communicates or perpetuates the prevailing societal view that being gay is less desirable and/ or that you may not be supportive of LGBTIQ+ people.

Gays are looked down upon for the reason that nor are Gays considered a man nor a woman in society they are referred to something in between but is that the right thing? Shouldn't Gays be referred as a separate gender with equal respect and dignity? If we start questioning it is never ending out of my personal experience with knowing a lot of Gays I have realised that Gays have the normal structure meaning socially sanctioned like a man but have feelings for another man which makes them different but do not even have
